## Secure SafeWord 2008 – Two-Factor Authentication

### Access Your Business

Secure SafeWord® 2008 two-factor authentication from Secure Computing® protects your most important information assets and applications. Secure SafeWord's easy-to-use tokens and seamless integration with your existing Microsoft infrastructure make it simple to deploy two-factor authentication for VPNs, Citrix applications, Web applications, Webmail, and Outlook Web Access.

Deploy the token that is used by millions every day:

- † DZ` a]V Rdf dX` R aRdth ` dJ
- † ;f dbaf dY` eYV Sf æ \_
- † 7ædZ` j` fca` TVe` \_ R\Vj ring, or in your briefcase
- † E` \V\_d eYRe` VgVcVi aZV
- † =ZMæZ` V h RæR` g

Be up and running protecting your most important assets and applications:

- † 4ZæZ` 2aa]ZReZ` \_d
- † > Zc` d W@f e` ` \ H VS 2TTVd
- † GA? dW` ^` 4Zf` E4YV\ A` Z` d Juniper, and others
- † > Zc` d W:2D

Use the solution that is ideal for your Windows environment of today and tomorrow:

- † :` æR]d` Z` ^` Z` f` e\ d` R` U` d\ b\ f` æ\ d` little or no ongoing care
- † F` d\j` ` f` c` Vi` ææ` X` Y` R` d` U` h` R` c` V`

### Introducing the Enterprise Solution Pack >> (more information inside)

Secure SafeWord 2008's Enterprise Solution Pack allows you to deploy and protect more applications, use your phone as a two-factor authenticator, and lower your overall total cost-of-ownership through tools that make the job of deploying two-factor authentication simple for your administrators and users.

## Choose the Authenticator That Meets Your Requirements

With the push of a button, Secure SafeWord tokens generate a highly secure, one-time passcode that can never be re-used, hacked, or otherwise compromised. The Secure SafeWord passcode provides a secure, two-factor authentication mechanism that ensures that only properly authenticated users are authorized access to critical applications and data.

Secure SafeWord offers a set of authenticator options, including hardware tokens and mobile phone authenticators. Choose any combination of tokens and authenticators that best suits your remote access environment.

**Lifetime Token Warranty**  
Secure SafeWord 2008 tokens never expire and come with a lifetime token warranty. Secure SafeWord eliminates the need to replace and deploy new tokens every three years and helps reduce your cost of ownership. Simply return tokens at any time for a free replacement. You must be current on your support contract for all of your users to be eligible.

## Protect Critical Applications

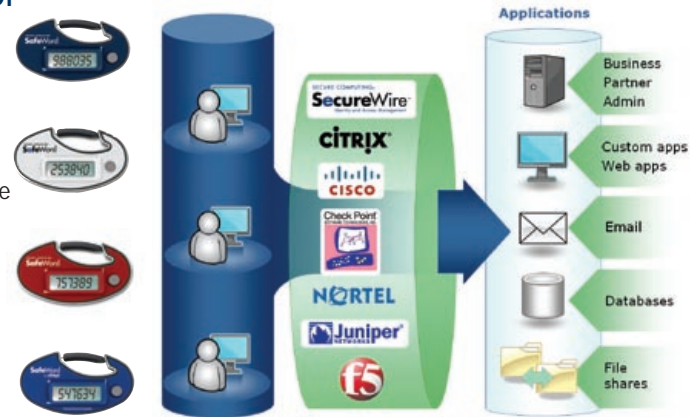

Your VPN is your remote link to your network assets. Secure SafeWord adds a vital security component to your remote access solution and works with a wide variety of popular access platforms. Secure SafeWord is available in branded and Access Management capabilities to improve productivity with the Enterprise Solution Pack access gateway.

Secure SafeWord Wins Best Two-Factor Authentication Award from SC Magazine

## The Best Solution for Your Windows Environment

Secure SafeWord 2008 is designed for Windows 2008. SafeWord enables you to leverage operating systems, including Vista, Windows 2008 Server, as well as your Microsoft windows infrastructure. Secure SafeWord two-factor authentication will be there, fully integrated and ready to help you drive productivity and security.

## > R\_RXV F dVadZ\_ 2TegV 5ZVTè j

Secure SafeWord installs in minutes and offers seamless integration with Microsoft Active Directory. Secure SafeWord is fully integrated with your existing infrastructure and provides a secure, easy-to-use solution for your users.

## Who Needs Two-Factor Authentication?

The short answer is: Everyone conducting business in today's environment. Secure SafeWord protects access to the foundational networks and resources on which your business runs. And it provides this protection across a wide range of users:

- † > `S`V h` cWcTVd+oRjVdVad.} VJU eVR^ dL business and technology consultants
- † 3f dZ VdlaRe\_Vcdh Y` RTTVdR acZgR/ network
- † 9` ^ V` WTV h` cVad+^ R`VeZ\_XLTF dè ^ Vc service and support, and others
- † 4f dè ^ Vcdh Y` RTTVdR af SJZIVITZ\_X H VS application
- † 8f VdèR\_U e/` a` dRj h` cVad
- † 9VRjè/TrcV ac` WctZ`\_Rjdè/Re\_WU è access and protect patient data
- † AVad \_\_Vjh Y` RTTVdR T` ^ ^` \_ workstation or work environment

## Secure SafeWord 2008 Enterprise Solution Pack

Secure SafeWord 2008's Enterprise Solution Pack allows you to deploy and protect more applications, use your phone as a two-factor authenticator, and lowers your overall total cost of ownership through tools that make the job of deploying two-factor authentication simple for your administrators and users.

### Secure SafeWord VPN

allowing you to make applications, data, and network connectivity available to your employees, contractors, business partners, and customers. Whether it is full VPN connectivity or browser-based, encrypted authenticated access from across the room or around the world.

### Secure MobilePass

Secure MobilePass® provides Secure SafeWord two-factor authentication directly from your BlackBerry, Windows Mobile, Palm, or J2ME-based phone using a dedicated application on the phone or SMS text messaging. Authentication is provided by something you have and something you know. For years this has been the description of two-factor authentication. With MobilePass, you are now authenticated with something you *already* have—your mobile phone—eliminating the need to distribute, maintain, and carry an additional device. MobilePass is easy to distribute, inexpensive to maintain, and quick to deploy.

### User Self-Help and Enrollment

enroll users to help themselves via a simple, easy-to-use, easy-to-deploy Web application. From any browser, without a call to the help desk or system administrator, your users can enroll and manage their own accounts.

### Secure SafeWord 2008 Management Console

The Enterprise Solution Pack provides enterprise-wide management of users, tokens, and access rights as well as event logging and reporting.

### Windows Domain Login, Terminal Services, and Remote Desktop

The Enterprise Solution Pack protects user desktop logins to Windows domain resources, Terminal Services, and Remote Desktop.

## Why Choose Secure SafeWord 2008?

- † Reduces Windows 2008 Server environment costs.
- † Simplifies administration, management, and deployment for Windows environments.
- † Reduces total cost of ownership (TCO) by up to 50%.
- † Reduces deployment time by up to 75%.
- † Eliminates the need to replace hardware every three years.
- † Reduces the total cost of ownership (TCO) over the long haul.
- † Provides a secure, scalable, and flexible software token solution.
- † Provides a secure, scalable, and flexible software token solution.
